

IF statement

```
if ( (age<20 && name="Alice") || (age>=20) ) {  
    age = age + 1;  
}  
else{  
    name = "Alice " + "Alicson";  
}
```

else statement is optional

Look at the operator switch as well

Loops

```
let i = 0;  
while (i<100) {  
    console.log(i++);  
}
```

```
for(let i=0; i<100; i++) {  
    console.log(i);  
}
```
