

Backend Templates

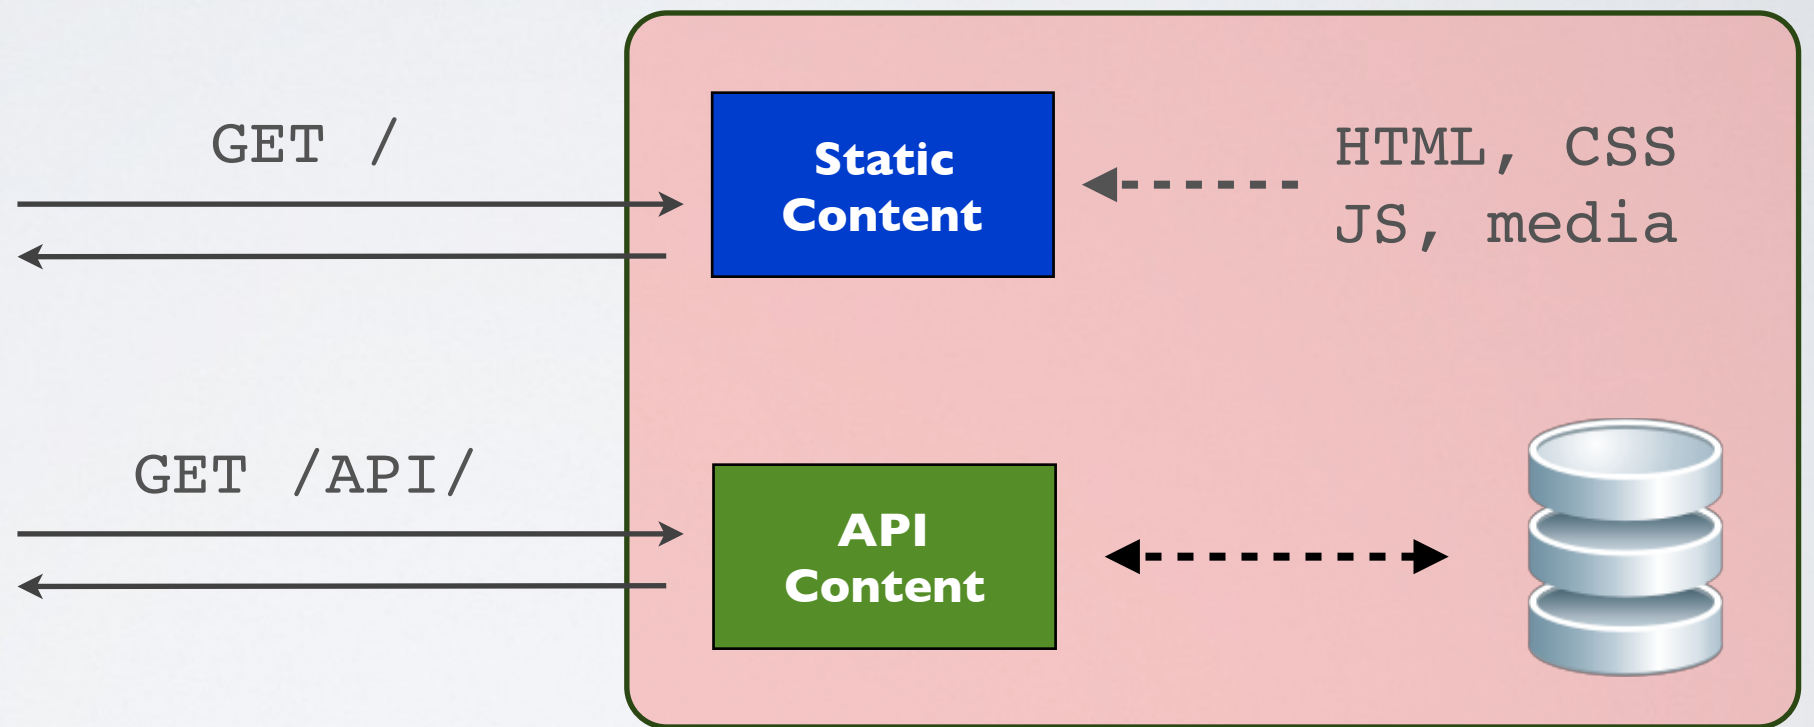

Thierry Sans

Our application so far

Frontend

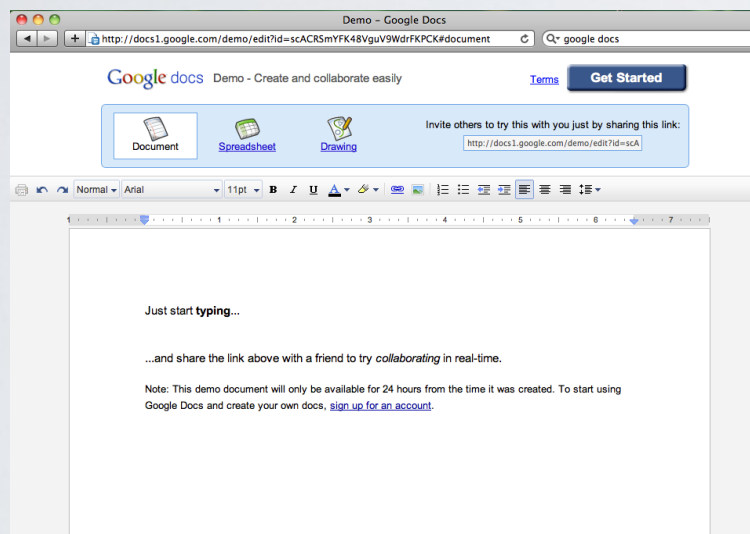

Backend

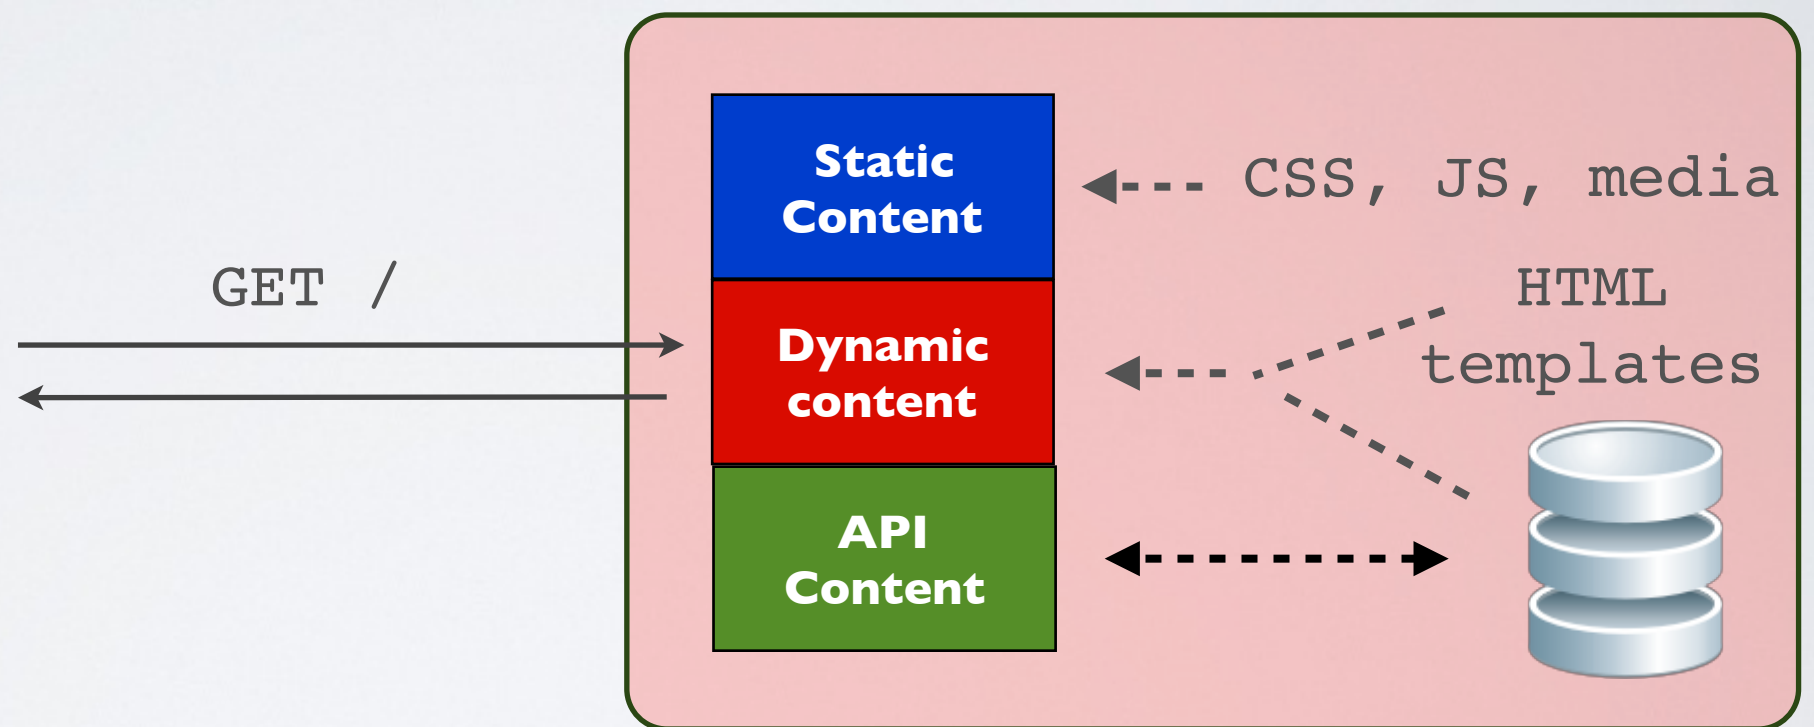

Dynamic content (using HTML templates)

Frontend

Backend

Advantages of using templates in the backend

- Better code reuse and maintenance
- Faster loading time

Better code reuse and maintenance

Some pages might share

- headers (title, JS and CSS)
- page organization (**div** tags structuring the page)
- footers (if any)

Faster loading time

- Dynamic pages are built on the server and can be retrieved with 1 HTTP requests (instead of 2 with the ajax API call)
- Dynamic pages can be cached on the server

Template engines compatible with Express

- Pug
- Moustache
- EJS
- Jade
- ... and others <https://expressjs.com/en/guide/using-template-engines.html>
