

Debug message on the console

```
console.log("Houston, there is a problem");
```

Constants and Variables - var vs let

```
var name = "Alice";  
var age = 28;
```

old way
(should not be used)

```
let name = "Alice";  
let age = 28;
```

new since es6

```
const name = "Alice";  
const age = 28;
```
