

Solution 1: using **strict mode**

- ➡ Force the browser to validate Javascript against the standard
- ✓ Dynamically raises errors (or warnings) in the console when the code is not compliant with the standard

```
"use strict";
```

```
let doSomething = function() {  
    // this runs in strict mode  
}
```

Solution 2 : using JSHint

- ➡ Analyze Javascript source code with JSHint
- ✓ Statically finds bugs and reports them in the terminal

```
$ npm install -g jshint  
$ jshint myScript.js
```
