

Handling files

Browser restrictions

- It is **impossible** to write a piece of code that reads an arbitrary file in (server-side) Javascript

➔ Only files selected by users through file input forms can be processed

```
<form . . . >  
    <input type="file" name="img" multiple>  
    <input type="submit">  
</form>
```

[optional] select
multiple files
