

asynchronous

Concurrency issue in Ajax - a typical example

`result` will either be `""` or `"Hello world"`
depending on the program and the execution context

➡ **Race Condition!**

```
let result = ""  
  
const xhr = new XMLHttpRequest();  
  
xhr.onload = function () {  
    result = xhr.responseText;  
}  
  
xhr.open(method, url, true );  
  
xhr.send(body);  
  
document.getElementById.innerHTML = result;
```

assignment

access
