CSS: Inline, embedded or separate file?

Inline: style attribute

```
 ...
```

Embedded: specified in the header (<head>)

```
<style TYPE="text/css">
    p{background: blue; color: white;}
</style>
```

Separate file: file locator in the header (<head>)

```
<link rel="stylesheet" type="text/css" href="style.css"/>
```

Classes

Classes are attributes of HTML elements for which we want to define **common properties**

```
<div class="special">...</div>
```

Define the same style for all elements of the same class

```
.special {
    margin-top: 10px;
    font-family: "Helvetica", "Arial";
}
```
