Associative Arrays (aka Hashtables or Dictionaries)

```
let myDict = new Object();
myDict["first"] = "JavaScript";
myDict["second"] = "is";
myDict["third"] = "fun";
let myDict = {};
myDict.first = "JavaScript";
myDict.second = "is";
myDict.third = "fun";
let myDict = {first: "Javascript",
              second: "is",
              third: "fun"}
```

Iterate through collections

```
let person={
    fname: "Alice",
    lname: "Alicson",
    age:30
};

for (let x in person) {
    console.log(person[x] + " ");
}
```
