## Mixing video and canvas

Exactly the same as drawing an image!

context.drawImage(videoObj, destX, destY, destWidth, destHeight);

## Getting and setting a video frame using canvas

## Get the current image frame

```
let frame = myCanvasCtx.getImageData(0, 0, width, height);
```

Set the current image frame

```
myCanvasCtx.putImageData(frame, 0, 0);
```
