## Speech2Text - setup

```
const recognition = new webkitSpeechRecognition();
recognition.continuous = true;
recognition.interimResults = true;
recognition.lang = 'en-us';
recognition.onresult = function (e) {
    for (let i = e.resultIndex; i < e.results.length; ++i){</pre>
                console.log(e.results[i][0].transcript);
```

## Speech2Text - control

```
Start
                 recognition.start();
Stop
                  recognition.stop();
```
