Browser restrictions

- It is **impossible** to write a piece of code that reads an arbitrary file in (server-side) Javascript

➡ Only files selected by users through file input forms can be processed

```
<form . . . >
    <input type="file" name="img" multiple>
    <input type="submit">
</form>
```

[optional] select multiple files

Sending a file from the terminal

```
$ curl -X POST
       -H "Content-Type: multipart/form-data"
       -F "picture=@localpath/to/img.png"
       -F "username=bart"
       http://...
```
