OAuth 2

(Standard) RFC 6749

1. The backend **redirects the user to the third-party login-page**

2. Third-party **asks and verify the login/password** based on the third-party user information

3. Third party **redirects the user back to the application** with a OAuth token and verifier in the url

4. Backend **verifies the token** with third party

5. Backend **starts a session**

➡ User's login/password never transit by the application frontend nor backend
