Calling a promise

```
readFile(filepath)
    .then(function(data){
        console.log(data);
    })
    .catch(function(err){
        console.log(data);
    });
```

Calling a promise with async/await

```
async function run() {
    var data = await readFile(filepath);
    console.log(data);
};

run().catch(err => console.error(err));
```
