i18n & L10n

Thierry Sans

Internationalization (i18n)

"Internationalization is the process of designing a software application so that it can be adapted to various languages and regions without engineering changes."
Wikipedia

➡ **Make an application language agnostic**

Localization (L10n)

"Localization is the process of adapting internationalized software for a specific region or language by adding locale-specific components and translating text."
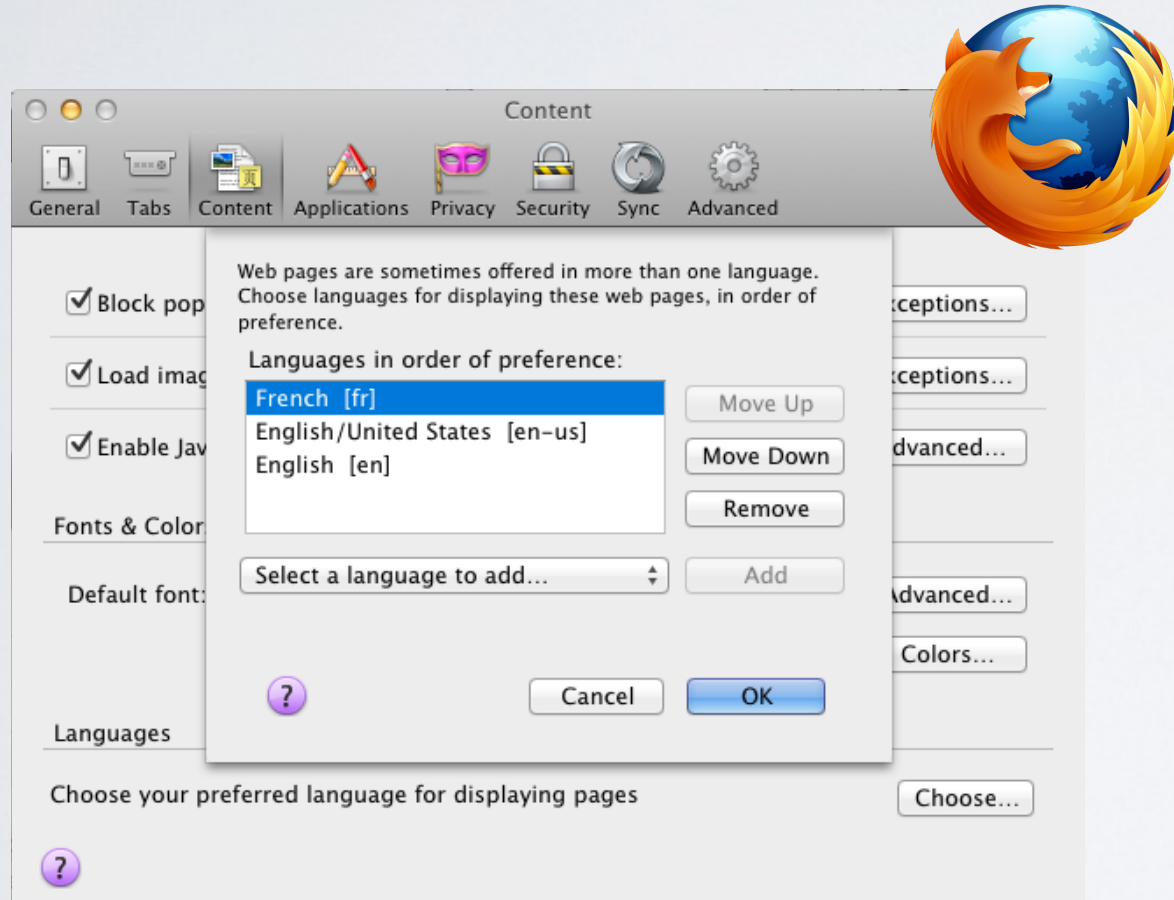

<div align="right">Wikipedia</div>

➡ **Adapting an application for a specific language (aka *locale*)**

It is is not only about language translation

- Number format
- Date/Time
- Punctuation
- Sort orders
- Units and conversion
- Currency
- Paper size
- Page layout
